Free literature available: Send for: Data sheets describing Kerr cells for Photography. Q-switching and light modulation, also High Voltage Pulse Generators, with nanosecond speed and very low jitter.

Products manufactured: Generators, Modulator/Demodulators, Networks

Advertisment

Kerr cells featuring picosecond response and apertures to 25mm for photography, Q-switching, and light modulation. Specialists in fast, high amplitude pulse generators with outputs to 30 Kilovolts or more, subnanosecond speed and very low jitter. Applications to electro optical modulators, spark gap triggering, laser excitation. Custom requirements are invited.

Products manufactured: Chokes, Coils Including Assemblies & Forms, Converters, Inverters, Transformers

Advertisment

MCE offers an extensive line of standard inductors and transformers with package options. These include 60 and 400 Hz transformers, lamination type or toroidal chokes, and precision inductors. Miniature high frequency, high temperature and high voltage units for power supplies are our specialty. Complete catalogue including engineering data and prices on request.

MilerTronics div. of George Miler Inc. designs and manufactures IC test equipment. Product line includes ROM programmers and accessories and diode matrix programmers. The MilerTronics ROM programmers include a remote socket. These programmers will operate fully automatically using the MilerTronics duplicator or tape cassette accessories and can be interfaced with computers. MilerTronics also designs and builds custom microprocessor systems.

Advertisement

Off the shelf and custom designed amplifiers, specializing in AC servo amplifiers and related modules: DC operational amplifiers and power amplifiers; professional quality audio amplifiers and special effects devices; military quality intercom equipment. If you have an amplifier requirement, check with MDI first! We probably have it on the shelf now, and if not, we're still able to reduce your engineering costs in designing it.

SOLID STATE TIMERS by Omnetics...
Plain, quiet, priced to save you money. All Solid State Circuitry gives you silently smooth system operation, superior performance and dependability. Example: The NEW M-Liners are 100% solid state, are high-temp. compression molded to withstand extreme environmental abuses, and are available in AC or DC from 24 to 240 volts. Time delays start at 0.6 second and can be had out to 8 minutes in fixed times or in adjustable ranges by adding a potentiometer control. A single mounting screw and some Quick-Connects make M-Liners easy to use. Cost is easy too.

- Repeat accuracy = 2%
- Operate resistive or inductive loads
- Stable with temp/voltage
- Built-in transient protection
- Rating: 1 ampere steady state (10 amps inrush)
- Low cost

Write now for FREE Catalog or call 315-699-5262 for information.

Advertisment

Ultra low noise (IDB typical) transistor amplifiers for use with infrared detectors and electrical transducers; voltage mode, current mode and automatic bias control. Standard models are available to match all infrared detectors and transducers produced in the U.S. and Europe. Multi-Element amplifier arrays are available in all operating modes with hybrid modules containing up to 100 signal channels.

Standard secondary function amplifiers such as; logarythmic, AGC, video, RF, etc., are also available from stock.

When your lead time is short, our off-the-shelf PDC series display modules can save you time and money on moderate volume or prototype applications. We have modules in a wide range of digit sizes. They include LED, incandescent and seven-segment numeric as well as dot-matrix alphanumeric. They're prewired for BCD logic and are ready to mount to your panel with just two screws. Ask for our catalog.

Free literature available: Photon Counting Catalog #T-335, contains complete specifications on Princeton Applied Research Corporation ratemeters, digital counters, amplifier discriminators, quantum photometers and photon counting accessories. Signal Averager Catalog #T-220B, contains complete specifications of our MOdel 162 Dual Channel Boxcar, Model 160 Single Channel Boxcar, Model TDH-9 100 Point Averager and Model CW-1 Single Channel Boxcar. Preamplifier specifications and accessories as well as several application summaries are included.

Lock-In Amplifiers Catalog #T218B contains complete specifications of all Princeton Applied Research Lock-ins, light choppers, ratiometers, low noise preamplifiers and current sensitive preamps. This Lock-In catalog also contains short section on How Lock-ins work, where to use them, how to choose one, a section on noise and 9 typical applications. Optical Multichannel Analyzer Catalog #T-336 describes Princeton Applied Research's 500 channel OMA. Complete specs on our Model 1205B Detector assembly.

Model 1205D Intensified Detector Head and Model 1205E IR Enhanced Vidicon Detector Head. Cooled Detector Heads are also described as well as several application summaries.

Products manufactured: Amplifiers, Analyzers, Cases, Equipment, Instrument, Meter, Controls/Control Eqpt., Converters, Data Acquisition & Reduction Systems, Detectors, Indicators, Integrators, Electronic, Magnetometers, Meters, Monitors, Multipliers, Signal Averagers, Signal Conditioners & Equipment, Transducers, Transformers

Advertisment

We design and build GOOD power supplies. We don't overstate our capabilities, or understate our prices. Scott Electronics just does the job as quickly as possible, and at the lowest cost to you. Military or Commercial - High or Low Voltage - Small quantity or by the thousands - Scott Electronics is anxious to assist you. When you need a quality regulated power supply, that not only meets your written spec., but performs in the field, contact Scott Electronics.

Filters : Equalizers
Whatever your needs – from spectral shaping and phase correction to time-domain synthesis-you can rely on the filter experts at SEG. Computer aided custom designs; DC to 120 MHz; sharp rolloffs; phase corrected; narrow bandwidths, production quantities and competitive pricing. NAME IT AND SEG WILL DELIVER IT ON SCHEDULE.

The SEG SIMULINE System offers the datacomm user and designer complete telephone channel simulation capability including all impairments such as phase jitter, phase hits, impulse hits, broadband noise, harmonic distortion, dropout, frequency translation, amplitude and delay distortion, echo, SFI, crosstalk, etc. These impairments are totally adjustable and repeatable for simulating foreign as well as domestic telephone channels.

SEL-REX CO. DIV. OXY METAL INDUSTRIES CORP., 75 River Rd., Nutley, N.J., 07110, Tel: 201-667-5200, TWX: 710-989-1423; Empl.: 250

Free literature available: SEL-REX STRIP-PLATING MACHINES - Brochure describes several plating systems engineered for a variety of individual production requirements whether for plating selectively or over-all.

Products manufactured: Chargers, Battery, Chemicals, Coatings, Converters, Electroplating Equipment & Supplies, Inks For Thick Film Microcircuits, Machines/Machinery, Production, Magnets, Metals, Microcircuit Production Equip., Paints, Power Supplies, Rectifiers, Resistors, Screens, Printed Circuit

Advertisment

SENSITIVE RESEARCH INSTS. Manufacturers of Polyrangers, Electrostatic Voltmeters, Wattmeters, AC & DC Voltmeters and Ammeters, all offered in both portable and panel mountings in ranges from microvolts to 140,000 volts, and microamperes to 1000 amps.
Typical Models:
ESH & ESD Electrostatic Voltmeters
VAW Volt Amp Wattmeters
100 KV NBS Design Park Divider
Custom Designs available. Write for a SENSITIVE RESEARCH catalog.

Free literature available: Heat Gun - temperature controlled: brochure describes features (some patented), applications, economic factors of use. Model C precision temperature chamber controller for upgrade/retrofit on old and modern chambers. Gives specs, instructions & function connections. Liquid carbon dioxide conditioners: for temperature chamber users. Brochure describes cleaning (by distillation), drying and prechilling liquid Co2 plus method of distribution in vapor stage thru uninsulated lines. Precision temperature chambers. Brochure gives features & specs on line of std. chambers, sizes from 25 to 150 liters.

Products manufactured: Chamber, Environmental Test, Controls/Control Eqpt., Heat Guns, Production

Advertisment

Liquid cardon dioxide conditioners for temperature chamber users. Sigma's model CDC-12 cleans (by distillation), drys and precools liquid Carbon Dioxide and permits its distribution in vapor stage through uninsulated lines. Also standard & custom chambers plus retrofit three mode controllers.

Free literature available: Crystal Growing Furnace - Model 860C, resistance heated, production furnace for growing silicon crystals by Czochralski technique. Diameters over 4 inches and charge weight up to 12 kg. Crystal Slicing Machine - Model NAV 701B, uses I.D. diamond wheels for precision wafering of brittle materials. Polishing Machine - Model 320A, high capacity high quality and automatic polishing of silicon wafers. Uses 1 step, no damage, polishing process. Dielectric Defect Detector - Model 201, uses Electrolytic/Electrophoretic Decoration process to detect pinhole defects in dielectric layers. Wire Bond Pull Tester - Model 220, permits non-destructive screening and testing of fine wires and bonds in semiconductors.

Products manufactured: Crystals, Detectors, Machines/Machinery, Production, Ovens, Semiconductor Wafer Fabrication

TECHNITROL, INC. cont'd

Advertisment

Technitrol has full capability for design, packaging, production of subminiature transformers; from stringent MIL-spec varieties to simple unencapsulated units, packaged singly or in multiples. A complete line of lumped parameter delay lines is available featuring new dynamic delay module with its TTC compatibility. The Technitrol Systems Division features a complete line of memory exercisers; core, platewire, semiconductor.

Advertisment

TTI's SYNCLAMPS are the ONLY quick-releasing, self-locking and INSTANT NULLING SYNCHROCLAMPS! Their INTEGRAL STOPS permit component mounting and nulling (techniques that can save 70% OR MORE of the mounting and nulling time!). SYNCLAMPS meet the MAXIMUM MIL SHOCK AND VIBRATION: 2000 ft-lbs/2000 cps! They also have the LOWEST INSTALLED COST of any type of clamp! A size and style for ANY size component and ANY application!!

PEERLESS

For well over a quarter of a century, Peerless has been servicing Electronic Component Buyers with more than the components or devices or packages that they buy. Included with every Peerless order is an assurance of accuracy down to the last detail, an assurance of quality control to the highest manufacturer's specs, an assurance of fulfillment of every world spoken and every promise made or implied. These assurances are important to a Purchasing Agent, they are at the core of the Peerless philosophy. Peerless Radio Corporation,

18TH EDITION

how to use eem 75 76

This issue of EEM is the largest, most complete catalog ever published in the electronics field. The two volumes contain more than 5,000 pages of up-to-date information. New features have been added and you may find it helpful to scan this page as a guide to the easy use of EEM.

1. INDEX OF MANUFACTURERS' CATALOG PAGES

When you need data from particular manufacturers, just look them up alphabetically in the index beginning on page 3 (green pages). More than 700 manufacturers have catalog pages in EEM, and easy reference is given for all these pages in two-number figures. The first number in bold type indicates the volume (1 or 2); the second, the page number. Example: **1**•141 means Vol. 1, page 141.

2. PRODUCT INDEX AND DIRECTORY

All products are indexed by basic type. Each product shows three groups of manufacturers:

1. **Boldface** listings with page references tell you that this manufacturer's catalog pages are right at hand in the white pages.
2. * the asterisk means that this manufacturer has catalog pages in the white section but not on this particular product.
3. Lightface listings, unmarked, means that the manufacturer has submitted a data sheet to verify that they do manufacture this product, but no further data is available in EEM.

New feature You'll find a handy Product Index and Directory in each volume. All product designations are in both volumes, but page references are given only for those products in that volume; you are referred to the other volume when the catalog pages are there.

New feature The letter "D" preceding the listing tells you that the product is available from distributors.

New feature The letter "M" preceding the listing tells you that the product is available in military specifications.

3. TRADE MARK DIRECTORY

If you have just a trade mark, this directory gives you the product it signifies and who makes it. We've black edgemarked the section for easy location. Beginning on page 2•301 (green pages), there are more than 2500 manufacturers' trade marks listed. Once you have the product and manufacturer, look in the Manufacturers and Sales Offices Directory for complete name and address.

4. MANUFACTURERS' CATALOG PAGES

Here is the greatest collection of detailed catalog pages on electronic products available anywhere. The section is indexed by product category, alphabetically. Manufacturers' catalog pages appear in each product category in alphabetical order. There is a handy guide to the product category in each volume of EEM on the page facing page 1. The great number of catalog pages were divided into the two volumes to facilitate handling.

5. MANUFACTURERS/SALES OFFICES DIRECTORY

Here is all the data on where they are — addresses and phone numbers of main offices, branch offices, local representatives, local distributors plus local contact names and phone numbers.

NEW DATA — Additional data included this year:

a. Minimum order accepted

b. Federal Supply Code (FSC) number

c. Qualified Parts List (QPL) number

d. Individual contacts by name for price data, application information, customer service

e. Free literature offerings

f. Summary of categories of products manufactured by each company

h. Corporate logos or trade marks for easy location of manufacturers. Manufacturers with catalog pages in EEM are indicated by **boldface** listings and page number references.

6. DISTRIBUTOR'S DIRECTORY

Yellow pages, black edgemarked for easy location, contain a geographic listing of electronic distributors offering name, address, phone number and sales manager. This section is to be found in Volume 2 following Manufacturers/Sales Offices Directory.

Your enthusiastic response and usage of EEM has helped make this edition the largest ever. Each year, we try to incorporate new features to make EEM better and easier to use. Your comments and ideas are sincerely welcomed. Please write Editorial Director, United Technical Publications, 645 Stewart Avenue, Garden City, N. Y. 11530.

EEM is published by United Technical Publications, div. of Cox Broadcasting Corp. Other publications serving the electronics industry are Electronic Products Magazine, O-T-S Catalog, IC Update Master, Electronic Marketing & Management (EM/M), Off the Shelf Magazine, Electronics Retailing and United's Cost and Pricing Service.

4 ways IC Update Master can solve the problem of device selection.

Smaller companies often offer special performance devices. How would you find a company making a device you need?

Go to the Master. Section 2 is a product guide to the entire IC industry. It allows you to survey all devices, their key operational characteristics, and the companies who supply each one.

You want to call for information on TI's MOS memories . . . What city would you call for information.

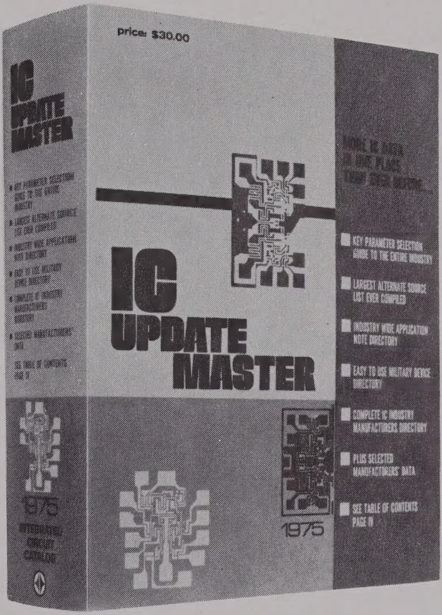
Go to the Master. Section 7 is a comprehensive telephone directory of the entire IC Industry. Page 7-37 lists Texas Instruments and the extension number for product information on MOS. It also contains a phone listing for TI sales offices and distributors throughout the country.

Motorola makes an MCM 4004 device . . . where would you look to find an alternate source for an MCM 4004?

Go to the Master. Section 3 is an industry wide cross reference. It contains over 14,000 cross references. Page 3-20 lists five other companies and their part numbers for pin-for-pin replacements of an MCM 4004.

Got a design problem . . . could an application note help?

Go to the Master. Section 5 is a comprehensive guide to the many IC application notes available. It lists the devices covered, describes each note and tells who publishes each one.



price: $30.00
IC UPDATE MASTER
MORE IC DATA IN ONE PLACE THAN EVER BEFORE...
KEY PARAMETER SELECTION GUIDE TO THE ENTIRE INDUSTRY
LARGEST ALTERNATE SOURCE LIST EVER COMPILED
INDUSTRY WIDE APPLICATION NOTE DIRECTORY
EASY TO USE MILITARY DEVICE DIRECTORY
COMPLETE IC INDUSTRY MANUFACTURERS DIRECTORY
PLUS SELECTED MANUFACTURERS' DATA

INTEGRATED CIRCUIT CATALOG

Over 2000 pages of help.

You can get a copy of the Master for only $30

There are literally hundreds of other problems the Master can help you solve. It is a totally new concept and should revolutionize the cataloging of IC data . . . it will make your job of device selection easier than ever before possible.

When you get IC Update Master you'll wonder how you've gotten along without it. Send check or money order for $30 to:

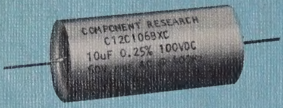
COMPONENT RESEARCH CO.

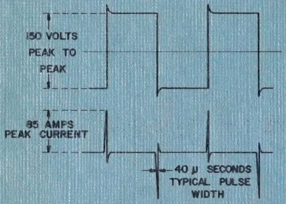
HIGH RELIABILITY PRECISION FILM CAPACITORS

• SEE OUR 60 PAGE CATALOG IN EEM STARTING PAGE 2•42



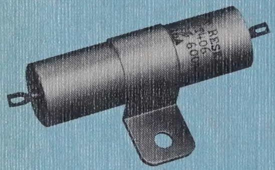
MIL-C-83421/1 QUALIFIED (SUPERMETALLIZED)

40 KHz AC rated, metallized polycarbonate capacitors qualified to MIL-C-83421/1 and MIL-C-39022/9C are available from stock. Because of superior performance they are titled "SUPERMETALLIZED." They are 100% reliability screened. For the Trident program, 30 VDC rated capacitors receive 168 hours of AC burn-in at 22 Vrms, 40 KHz, and 85°C.

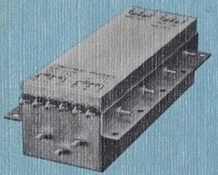


Component Research Company developed this AC dielectric withstanding test for use in MIL-C-39022/9 which was then superseded by MIL-C-83421/1. This test assists in early detection of abnormally high dissipation factor and high ESR. The voltage square wave when applied to each capacitor proves the ability of the terminations to withstand relatively high peak and RMS current.

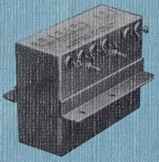
Typical voltage and peak current waveforms shown at left for A12B106, 10 μF, 50 V, metallized polycarbonate capacitor during the one minute AC square wave screening at 200 Hz.



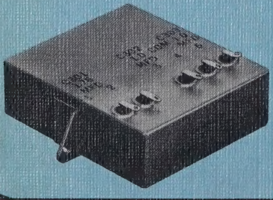
The .033 μF polystyrene capacitor shown can handle 300 Vrms at 25 KHz and fits in a 0.562" x 1.875" metal case. The capacitor features: high Q, tight capacitance tolerance and drift, and low controlled temperature coefficient. Additional configurations are available which are smaller in size and have higher AC current ratings.



This polystyrene capacitor network contains 8 precisely matched 1.2 μF sections. Each capacitor section is capable of operating with 170 Vrms applied at 25 KHz, with low heat rise. This network is one of many critical components supplied by Component Research Company for major weapons systems.



Component Research Company foil-polypropylene capacitors are used for various AC applications. This capacitor network is used in a weapons system where utmost reliability is required. Lower cost types can also be supplied for industrial applications with complete AC rating information.



In 1965 Component Research Company developed this precision metallized capacitor network for very accurate guidance and control of a sophisticated missile system. These networks are still being purchased annually due to their superb proven performance in field use. Their unique characteristics are: high insulation resistance, low dielectric absorption, low temperature coefficient, and low noise during environmental exposure.

COMPONENT RESEARCH CO., INC. • 1717 19th St. • Santa Monica, Calif. 90404 • (213) 829-3615
